

REACH DECLARATION

Montecchio Maggiore, January 2026

Dear Customer,

Reach regulation regulates the registration, evaluation, authorization and restriction of the chemical substances produced and/or imported into the European Union in quantity equal to one ton or more per year.

Thermoplastic materials (Polymers) have not to be registered and evaluated neither the products obtained for moulding because during the transformation (moulding) from polymer to item there is not change of the structure of the polymer. Also steel, brass metallic inserts are not subjected to mandatory registration.

Consequently, as thermoplastic material transformation company, GAMM is not compelled to register its items. In order to protect its customers since year 2008 GAMM has requested to all the suppliers to ensure that the products supplied to GAMM are REACH compliant.

Besides that, all GAMM's suppliers are compelled to inform GAMM of every change to every amendment of the **REACH Regulation**.

Up to date, the substance of the **Candidate List** (last updating on 18th November 2025) are not contained into our items.

For any further information you can send an e-mail to comm@gamm.com.

Best Regards
Uff. Commerciale
